This week at Cheder of Miami, the children learned about Parshas Shemos and enjoyed hearing and acting out the story of Moshe Rabeinu was a baby, focusing on how Hashem watches over us. The classes participated in hands-on projects, Show and Tell, and discussions that brought the Parsha to life. In afternoon nursery, the children explored animals and their habitat's and created beautiful animal puppets.

This week in Nursery...

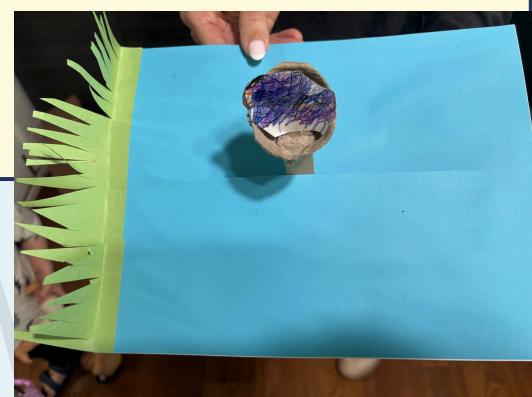

Dear Parents,

This week, we learned about Parshas Shemos. Morah shared the beautiful story of how Moshe Rabeinu's mother, Yocheved, placed him into a special basket and set him into the river. Moshe's big sister, Miriam, stood nearby to watch over him. The children especially loved hearing how Basya, Paraoah's daughter, stretched out her arm and lifted Moshe from the water.

We spoke about how Hashem was watching over baby Moshe and keeping him safe, and how we can always know that Hashem watches over us every day of our lives. Basya cared for baby Moshe in Paraoah's palace until he grew up to become the great tzadik and leader, Moshe Rabbeinu. The children enjoyed hearing the story many times and loved acting it out so much that we created a special project to help them retell the story to their families!

In afternoon nursery, the children had fun sorting animals by where they live, on land, in the air, and in the water. We are also learning the names of many new animals. Each child chose a favorite animal and created a popsicle stick puppet.

Have a wonderful Shabbos!
